test

Network & Data processing

57 continuously operating GNSS stations in distances ranging from 900km to 1400km from the epicenter Receiver type: LEICA
- most of them GR30
- also GRX1200GGPRO / GRX1200+GNSS
Antenna type LEICA
- LEIAR10 / LEIAS10
- few stations: LEIAX1202GG
Observation interval: 1s
Precise Point Positioning w Ambiguity Resolution
Sat systems:
GPS / GLO / GAL / BDS-2/3
Elevation angle: 7 deg
–Kinematic mode
Reference Frame: IGS20
Final IGS Products for satellite:
- Orbits (.SP3)
- Clocks (.CLK)
- Earth Orientation Parameters (.ERP)
- Attitude (.OBX)
- Bias (.BIA)
ANTEX File: IGS20_2247
For Tropospheric modeling: VMF1

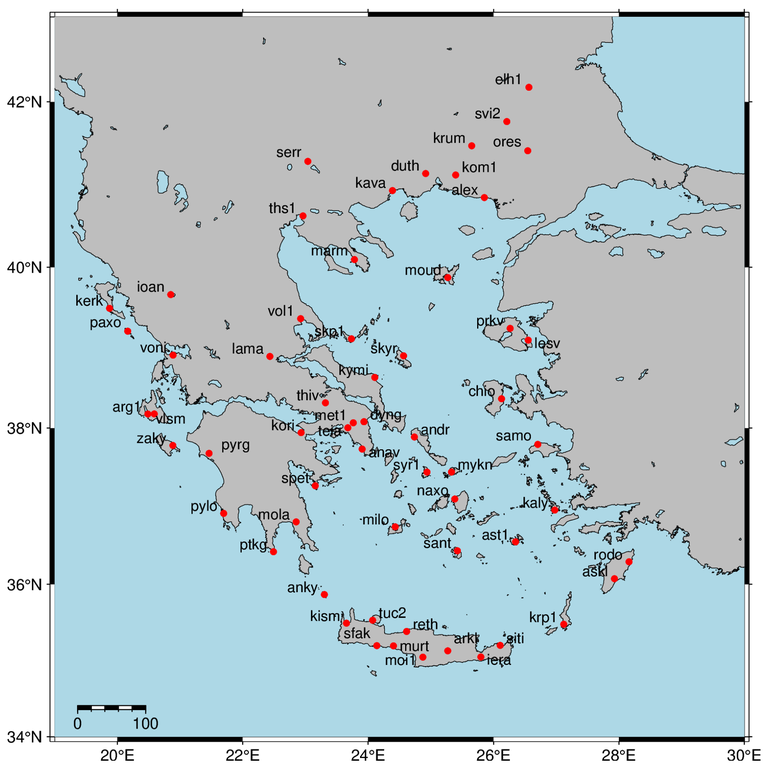

Figure 1:Processed stations.

39th GENERAL ASSEMBLY OF THE EUROPEAN SEISMOLOGICAL COMMISSION
ESC2024
22-27 September 2024
CORFU, GREECE
